

Omega Resource Group gains Government outplacement approval

Omega Resource Group plc have gained approval from the Department of Work & Pensions to provide outplacement services to managerial & executive personnel that have recently or are about to be made redundant.

The group's preferred supplier status will be announced to businesses that could make use of such services as CV guidance, interview technique training, job search training and general career advice for their staff.

The Public Sector initiative covers Gloucestershire, Wiltshire, Birmingham, Solihull, Coventry, Warwickshire and South East Wales and means that the group will work closely in conjunction with Business Link, Gloucestershire First, local Job Centres and the South West Regional Development Agency. "This is a valuable service that is clearly of particular relevance given the current employment marketplace" says Alan Beresford, CEO of Omega Resource Group plc "and we hope that this initiative will spread throughout the UK as companies realise the importance of arming their staff with the appropriate skills to tackle what can be a tough recruitment marketplace".
