

Omega Resource Group plc announced in the top 100 fastest growing private businesses in the UK

Real Business magazine in conjunction with LDC (Lloyds TSB Development Capital) have announced Omega Resource Group plc as the 74th fastest growing private company in the UK. This placing is based on accounts filed at Companies House up to March 6th 2009 and compound growth rates measured over a four year period.

The top 100 listing is a direct reflection of the entrepreneurial flair that has been the cornerstone of the Omega's success and is a major boost during tough economic times. As Real Business magazine states "There's no denying the climate has cooled for British businesses. But if there's a company with the entrepreneurial grit to survive the economic meltdown, you can bet it's featured in our Hot 100".

Alan Beresford, Group Director, is extremely proud of the achievement, "This is fantastic news for the company, especially when the economy is seeing a downturn. It shows that our team has the resourcefulness and passion to not only survive the recession, but to come out of it stronger than ever".
