

**The Gardline Marine Sciences group of companies is a leading marine contractor specialising in geophysical, hydrographic, environmental, oceanographic and geotechnical surveys. The company provides a wide range of integrated marine science services and currently operates a fleet of dedicated vessels including multi-role, nearshore and coastal and wind farm support vessels.**

**Omega International work closely with Gardline to understand their niche market and deliver candidates with the necessary experience to work in the offshore and onshore market.**

*"I am the Recruitment Coordinator for the Gardline Group and I have been in this role since December 2010. During this time I have had the pleasure of speaking and working with Aimee Smith regarding the ongoing recruitment for our business in 2011. There have been several roles that Aimee has worked on for me and I have been really impressed with how quickly and accurately she has submitted CV's to me. I have always felt confident when forwarding a CV to a manager that Aimee has sent as I know it will be accurate to the job description in question.*

*Aimee's efforts, open communication and outright professionalism have remained constant throughout while our requirements are established. I was particularly impressed whilst attending an industry exhibition in Southampton and Aimee turned up simply so that we could finally shake hands. This combined with all of the above has secured the fact that Gardline will continue to rely on Aimee and Omega for future recruitment needs. Sincerest thanks to Aimee for her efforts"*
